A pop explosion of electronic music, hallucinogenic video and free improvisation comes to Victoria on Sat. Oct. 21st 2006.

Presenting four screens of visual excess controlled by the warring talents of the Scheinwerfer collective from Zurich and Channel 10 from Victoria. Mashed with the glitch dance of NUTHRE, the experimental electronica of i send data live, and the robot electro sci-fi of Steve Gibson. A happening on the scale of it's 1960s namesake. A glut of technology, an overload of the senses, a chance to immerse and lose yourself in an audiovisualscape.

Don't miss this singular chance to see Zurich's Scheinwerfer, who have performed live visuals throughout Europe with many of the key players in techno and dance music including Josh Wink, Jeff Mills, Derrick May, Jimi Tenor and Mouse on Mars. Come out and experience their only appearance in North America, right here in Victoria! Combined with local talent in the experimental dance music scene as well as local VJs, this promises to be an evening to fondly remember twenty years from now.

Prices are a ridiculously low \$5 for admission and \$1 for a membership in the Channel 10 Club. We will feature a cash bar so no minors are allowed.
